BALING, MOWING AND WRAPPING

Baling

For big bales the **Claas Quadrant 3200 Roto-Cut Baler** can't be bettered. This baler is ideal for hay, silage and straw bales and can make them in varying lengths from .8m up to 3m. The Quadrant 3200 Roto-Cut Baler with knives can create finely chopped silage, great for feeding-out via wagons or bale feeders. We run a **Claas Liner 3000 Swather** in front of this baler for better quality bales and greater efficiency.

We have two **McHale Fusion 2 Baler Wrapper Combination Balers**. These balers run an 18-roller, fixed chamber system creating dense, evenly-formed bales. They also feature a 25 knife chopping bank to finely chop your silage making feeding-out of your bales simple and straight forward.

We also have a **Claas Markant Conventional Baler** for all your conventional hay requirements.

We run **Claas Liner 880 Swathers** in front of these balers for greater efficiency.

All our balers are equipped with **Pioneer brand Appli-pro Silage Inoculants Systems** to ensure the highest quality silage.

Mowers and Wrapping

Claas 8550 and Claas 9300 Triple Mower Conditioners can cut and condition your silage or hay in record time, making it worthwhile to get us to mow your grass.

We also have a **John Deere 3 metre Mower/Crimper** for smaller areas and lucerne mowing.

We have 2 **Tedders** and these are available to aid in drying your hay or silage crop for baling.

The **Goweil Wrapper** is the perfect complement for our balers. This can wrap both round and square bales and be operated both behind a tractor or stand-alone.

We only use the best quality silage wrap from **Agpac** including Trio Wrap and MiMa Wrap with ultra-high UV ratings to ensure your bales go the distance.

We are also agents for the **Plas-Back Recycling System** - on farm collection of agricultural plastic waste, the responsible way to deal with your on farm waste. Call the customer services office to order your recycling bin liners or bin - every bin liner holds around 200 wraps!

Delivery and Stacking

All these balers and wrappers can be supported by our **Auto Bale Trailer** or our **Truck and Trailer Units** for cartage anywhere in NZ. We can also stack your bales using a variety of front end loader or rear mounted tractor bale handling solutions.

Whether it's hay or silage, round square or conventional, we have the gear to get it done!
